< Rocío Arenillas />

<h1> Hola! I'm Chio 👋 </h1>

Hello,

My name is Rocío Arenillas, and I am a Web Designer and Front-End Developer based in Madrid.

I specialize in building modern, responsive, and user-centered digital experiences, combining design and development to create clean, functional, and visually engaging interfaces.

I have experience working with React, Next.js, TypeScript, JavaScript, HTML, and CSS, as well as tools such as Git, Figma, and Redux. I have developed several personal projects showcased in my portfolio, including full web applications, content platforms, and interactive projects with complex logic.

For the past 10 years, I have worked in roles related to team coordination, management, and customer experience, which has given me strong skills in communication, organization, and problem-solving.

I worked as a Travel Coordinator at WeRoad, where I managed groups of travelers, handled real-time incidents, served as the main point of contact before and during trips, and mentored new coordinators during their training process.

I also worked as an Immersive Entertainment Manager at FOX IN A BOX BOMBASTIK!, where I supervised a team of 30 people, managed scheduling, analyzed sales data, implemented marketing strategies, ran digital campaigns, and ensured high-quality customer experiences.

This background has given me a strong understanding of teamwork, leadership, and user experience, which I now apply to frontend development.

I am highly motivated to join a team where I can continue learning, contribute value, and grow as a developer.

Thank you for your time and consideration.

Best regards,
Rocío Arenillas
