< Rocío Arenillas />

<h1> Hola! I'm Chio 👋 </h1>

Hello World,

My name is Rocío Arenillas and I am a Frontend Developer based in Madrid, specialized in React and user-centered interface development.

I recently completed a Master's degree in Frontend Development and UX/UI, where I worked with technologies such as React, Next.js, Vue, TypeScript, JavaScript, HTML, and CSS, as well as tools like Git, Figma, and Redux. I have built several complete projects involving API consumption, state management, and responsive design, which are available in my portfolio.

My profile combines both development and design, allowing me not only to implement interfaces but also to make decisions with a strong focus on user experience.

Before transitioning into tech, I spent over 10 years working in team management and customer-facing roles. This background helped me develop strong communication, problem-solving, and organizational skills, which I now apply in technical environments.

Additionally, I hold a C1 level in English and have international experience after living and working in the UK for two years, which allows me to work comfortably in international teams.

I am currently looking for my first opportunity as a Frontend Developer, where I can continue learning, contribute from day one, and grow within a team.

Thank you for your time and consideration.

Kind regards,

Rocío Arenillas
